

**OMK** is the market leader in public area seating. Established in 1966, we have supplied over 100 airports, railways and ferry terminals world-wide and have the experience and product range to provide seating solutions for all waiting area projects. Our products are developed in-house and reflect the demand for comfortable, durable and easy maintenance seating. From our head office in central London, we offer a free planning service to ensure that we meet the specific requirements of each end user. **Designed by Rodney Kinsman**

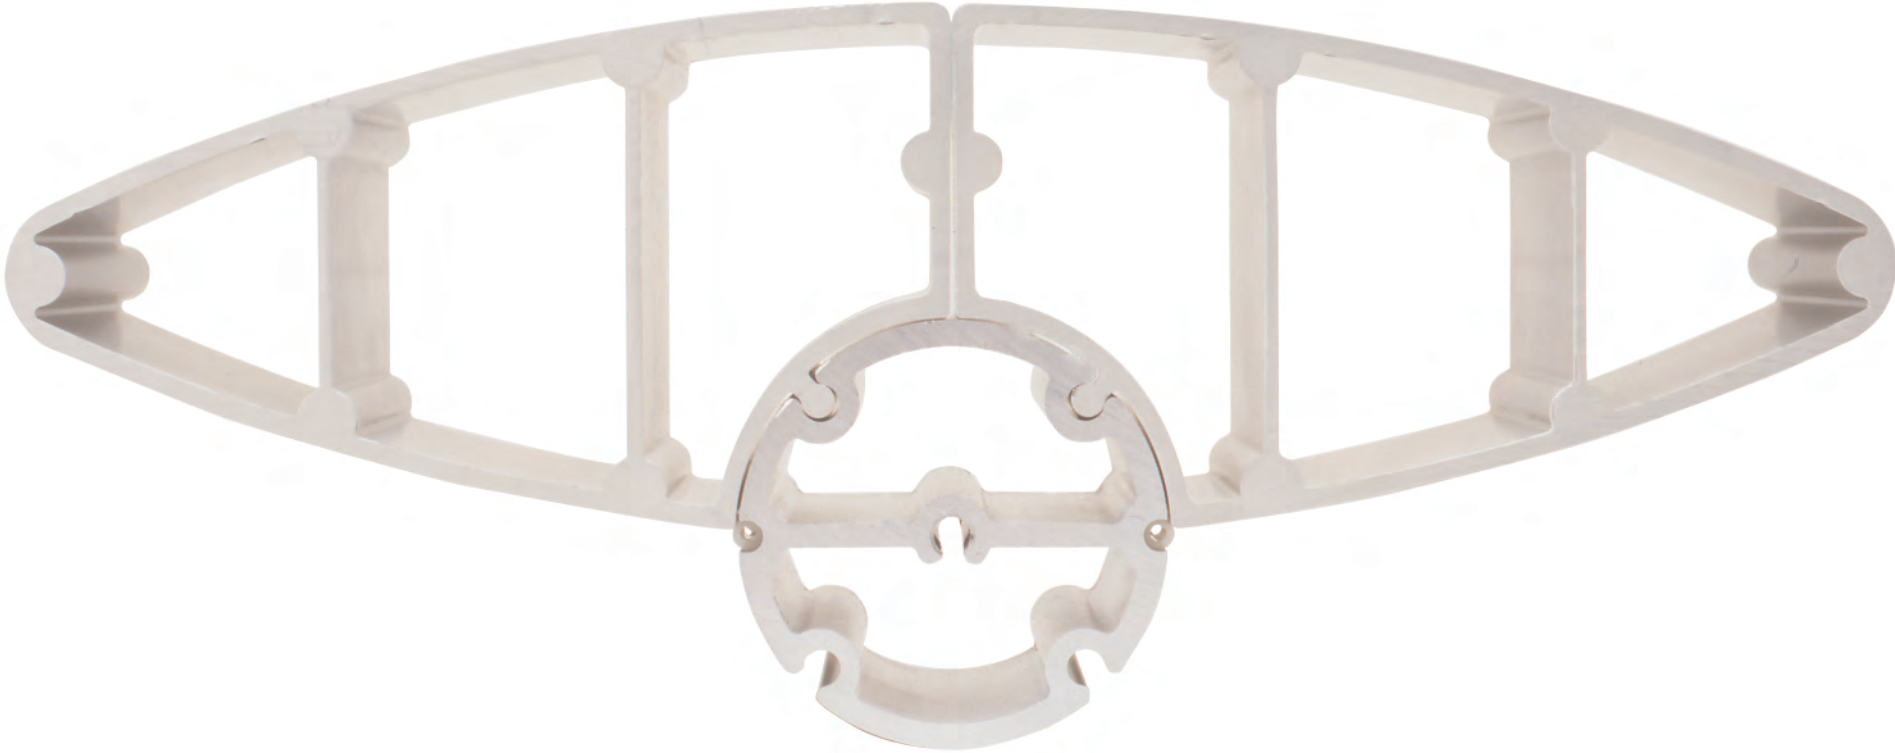

# **SEVILLE** PUBLIC SEATING SYSTEM

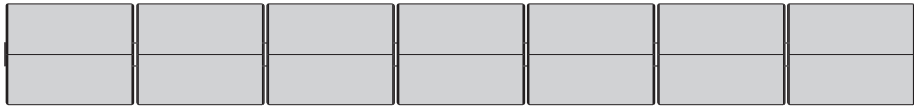

**SEVILLE** is designed as a short sit bench. The aerofoil form of the seat, evoking high speed travel combined with 21<sup>st</sup> century technology, utilises interlocking extruded aluminum seat and beam sections, with an anodised finish. The individual seat component slide onto the beam and are held into place by die cast aluminium end caps; no other fixings are required. The seat can be either floor fixed, wall mounted or free standing.

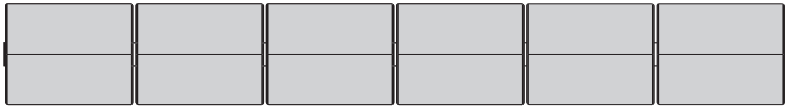

The extremely durable finishes are weather proof and the curvilinear nature of the seat surface sheds water, making **SEVILLE** suitable for indoor and outdoor use.
